WASHINGTON, D. C.

March 15, 1945

MERCHANTABLE POTATO STOCKS AS OF
MARCH 1, 1945 WITH COMPARISONS

Stocks of merchantable potatoes held by growers and local dealers in the 37 late and intermediate States were 26 percent below the record March 1, 1944 stocks but 19 percent greater than the March 1, 1943 stocks. Estimates of the Department of Agriculture show holdings of 55,350,000 bushels on March 1 this year, compared with 74,980,000 bushels on March 1, 1944 and 46,350,000 bushels on March 1, 1943.

Ninety-six percent of the March 1, 1945 stocks were in the 18 surplus late States with growers and local dealers in Maine holding 36 percent of these stocks. Maine stocks of 20,050,000 bushels of potatoes were almost equal to the record holdings of 20,400,000 bushels held by growers and local dealers on March 1, 1944.

Potatoes available for marketing for food, seed and processing on and after March 1 are included in these estimates. However, potatoes held on farms for home consumption and for planting on producers' own farms, together with an allowance for the usual shrinkage and waste from March 1 to the end of the marketing season, are excluded from these estimates.

Marketings from the beginning of the season to March 1 in the 37 late and intermediate States are estimated at 185,851,000 bushels compared with marketings of 212,536,000 bushels to March 1, 1944 and 176,526,000 bushels to March 1, 1943. Potato shipments were delayed in January and February by a shortage of cars and bad weather in eastern and central States. Marketings of 49,310,000 bushels in January and February of this year were 16 percent below the 59,040,000 bushels marketed in these two months last year and 9 percent below the 54,430,000 bushels marketed in January and February 1943.

Shipments by rail and boat in January and February of this year amounted to 30,149,000 bushels or 61 percent of total disappearance in these months. Recorded rail and boat shipments of 36,440,000 bushels in January and February 1944 accounted for 62 percent of disappearance. A total of 31,496,000 bushels or 58 percent of disappearance in January and February 1943 moved by rail and boat.

POTATOES (IRISH); SEASON SALES AND MERCHANTABLE STOCKS IN HANDS OF GROWERS AND
 LOCAL DEALERS JANUARY 1 AND MARCH 1 IN THE 37 LATE AND
 INTERMEDIATE STATES - CROPS OF 1942, 1943 AND 1944
